

GREAT EASTERN TRAIL PREFERRED ROUTE

Hamilton County, Tennessee

North Chickamauga Creek Gorge State Natural Area

Cumberland Trail Trailhead

Montlake Road

Dayton Pike

Soddy Daisy

Great Eastern Trail (GET) Preferred Route Sections:

Section A Cumberland Trail (CT) – TN State Parks. Primitive foot trail exists along creek, needs a bridge over creek to connect to CT's Montlake Road trailhead. Sidewalk along Dayton Pike is desirable if the CT's 3-mile road walk there proves not to be an interim measure. From here, GET follows CT northward to TN-KY border and the Cumberland Gap National Historical Park.

Section B Trail routing study has been done by the Cumberland Trails Conference

Section C North Chickamauga Creek Greenway master plan (approved by Planning Commission & adopted by City of Chattanooga in 1989) is partially implemented. Land and easement acquisition for the trail is nearly complete. Multi-use trail is built from Greenway's Lake Resort Drive trailhead to a point north of Hamill Road and also next to Hixson Middle School. Development of trail along north side of TN River and across C. B. Robinson Bridge has long been included as part of the Tennessee Riverpark master plan.
C. B. Robinson Bridge: Multi-use pedestrian pathway on bridge is needed. Engineering studies have confirmed its feasibility. Funding needs to be secured.

Section D Completed. GET route co-aligns with existing TN Riverwalk, Guild Trail, and National Park Service trails on Lookout Mtn.
